SUMMARY

Software Engineering graduate specializing in frontend development with React and JavaScript. Experienced building responsive, production-grade UI components for live academic platforms and collaborating within agile teams. Eager to contribute to impactful projects as a frontend or full-stack developer.

SKILLS

Frontend: React.js, JavaScript (ES6+), HTML/CSS, Material UI, Context API, React Router, Responsive Design, UI/UX Fundamentals, Animation Techniques

Backend & Data: RESTful APIs, SQL/NoSQL, MySQL, MongoDB, Data Visualization, Web Storage Solutions, OOP

Tools & Practices: Git/GitHub, Version Control, Agile Methodologies, Automated Testing, Software Testing, Team Collaboration, User Interaction

EXPERIENCE

Front-End Development Intern | Bethlehem University, Bethlehem

June 2025 – August 2025

- Implemented production-level frontend engineering practices in a live academic system, ensuring stability and performance.
- Worked with the development team to enhance usability and responsiveness of the platform, resulting in better user engagement.
- Enhanced frontend UI components for the university's evaluation system, improving user experience.

Scholarship Recipient & Project Developer | Udacity & Palestine Launchpad

March 2024 – January 2025

- Selected for the Intro to Programming Nanodegree scholarship based on merit.
- Developed capstone projects in Python and JavaScript, applying agile methodologies and collaborative development practices to enhance project outcomes.
- Collaborated remotely on diverse projects, contributing to team successes and project deliverables.

EDUCATION

Bachelor of Science, Software Engineering | Bethlehem University, Bethlehem

Expected June 2026

Relevant coursework: Data Structures & Algorithms, Software Architecture & Design, Database Management Systems, Software Testing & QA, Service-Oriented Architecture, Software Requirements Engineering, UX & Interaction Design, Cloud Software Engineering, Artificial Intelligence.

CERTIFICATIONS & AWARDS

- NASA Space Apps Challenge 2025 — National-Level Finalist, Palestine
- Risk Management, IEEE Bethlehem University Student Branch — 04/2024
- Digital Security, IEEE Bethlehem University Student Branch — 04/2024
- IEEEExtreme 18.0 Participation, IEEE — 10/2024
- IEEEExtreme 17.0 Participation, IEEE — 10/2023

PROJECTS

AIMOPS — *AI-Driven Marketing & Operations Predicting System, Graduation Project*. AI-powered SaaS platform for small retail businesses. Built the frontend architecture in React using a scalable, feature-based structure supporting multilingual (i18next) delivery. Developed interactive analytics dashboards with Apache ECharts for sales forecasting, demand prediction, and campaign/event analysis.

Space Haven — *NASA Space Apps Challenge 2025 — National Finalist, Palestine*. Built a web platform making space architecture design interactive and accessible, integrating 3D scenes (Three.js) and AI-assisted asset generation. One of a small number of national finalist teams selected in Palestine out of the full 2025 challenge cohort.

Kidzy — *Gamified Learning Management System, Graduation Project*. Built a gamified LMS for children aged 6–12 with course management, quizzes, an XP reward system, and unlockable games. Presented the finished platform at Bethlehem University's Graduation Project showcase. Stack: Java Spring Boot, React.js, Material UI, React Canvas.

E-Commerce Perfume Store. Responsive e-commerce site with a modern UI, built with HTML, CSS, and JavaScript.

Personal Portfolio Site. Designed and built to showcase projects and technical skills.

IEEEExtreme 18.0 & 17.0. Competed in IEEE's global 24-hour programming competitions, solving algorithmic challenges in Python and Java.
